- Post Q3 2012 end, availability of second $10 million tranche of Macquarie Bank Finance Facility and extension of Facility Repayment Date to 30 June 2014

Operational

- Gold production from the Corihuarmi Gold Mine was ahead of management expectations at 7,660 ounces (Q3 2011: 9,718 ounces). Production declined due to anticipated lower grade ore
- Corihuarmi site cash operating cost increased to $552 per ounce (Q3 2011: $356 per ounce) due to anticipated lower production
- Environmental Impact Assessment has been approved for the Don Nicolas Project in mining friendly Santa Cruz Province, Argentina and the development permit issued. Financing discussions are progressing
- The Definitive Feasibility Study on the Company's flagship Ollachea Project, Peru, is on track for completion during Q4, 2012
- Excellent progress has been made on the exploration drive at Ollachea, reaching 669 meters as of 31 October 2012. Exploration of the eastern strike of the deposit by diamond drilling is scheduled to commence in Q4 2012. Underground access to the orebody is expected in Q1, 2013

CHAIRMAN'S STATEMENT

The financial performance for the three months to 30 September 2012 was gratifying with our Corihuarmi Gold Mine in Peru continuing to outperform expectations. The Definitive Feasibility Study ("DFS") at the Company's flagship project, Ollachea, in southern Peru, is nearing completion and excellent progress continues to be made on the exploration drive. After only five months from submittal, the Environmental Impact Assessment ("EIA") on the Don Nicolas Project was approved by the Santa Cruz provincial government, Argentina, and the development permit issued.

Sales revenue of $12.5 million was based on an average gold spot sales price of $1,667 per ounce. Sales revenue for the period was higher than Q2 2012. Gross profit was $5.8 million and EBITDA was $4.8 million. Profit before tax was $3.5 million resulting in a profit after tax of $1.7 million. The Company's cash balance at the end of the quarter totalled $10.4 million. Subsequent to the end of the quarter, the second $10 million tranche of the $20 million Macquarie Bank finance facility was made available and the repayment date for the entire facility extended from the 31 December 2012 until 30 June 2014.

Gold production at Corihuarmi of 7,660 ounces was well above the Company's budget and the highest quarterly production in 2012. Nevertheless, this was 21% below production in the third quarter of 2011 which is related to the expected falling grade which averaged 0.47g/t gold compared to 0.66g/t gold in the corresponding period of 2011. Mining continued to largely focus on the Susan outcrop and the broken scree material. Site cash operating costs continued below expectations and averaged $552 per ounce, well below the Company's budget.

All data gathering for the Ollachea definitive feasibility study (DFS) was finished, including metallurgical testing, geotechnical and hydrology studies. Archaeological clearance of the required sites has made excellent progress. Engineering, mine design, scheduling and cost estimation by project managers AMEC (Peru) S.A. and Coffey Mining Pty Ltd ("Coffey Mining") is nearing completion and the results are on track for release during Q4, 2012. The EIA is continuing in parallel with the DFS.

Excellent progress was made on the 1.2 kilometre exploration tunnel with the advance reaching 669 meters by 31 October. Ground conditions in the slate rock type which hosts the orebody have proven very satisfactory providing much practical mining and geotechnical experience which is already being applied to mine design and production schedules. Drill tenders are being evaluated to allow exploration of the eastern strike extent of the deposit by underground diamond drilling to commence in Q4, 2012. Completion of the drive remains on track for Q1, 2013.

The EIA on the Don Nicolas Project in Argentina has been approved by the Santa Cruz provincial authorities and the development permit granted. We have received outstanding support from the Santa Cruz government officials with the permitting process taking only five months from submittal in May 2012. We are now focused on engaging an engineering company and arranging finance to allow development to commence in 2013, with commissioning expected in late 2013 or early 2014. The project is a simple open pit operation mining high grade epithermal veins and using conventional carbon-in-leach treatment to produce an average of 52,400 ounces of gold and 56,000 ounces of silver per annum.

Also at Don Nicolas, all assay results from the 189 hole, 18,700 meter drill program on the Martinetas vein field have been submitted to consultants Coffey Mining who are carrying out an update on the resource estimate. This is scheduled for completion during Q4, 2012.

Minera IRL's share price has improved during the quarter and, at the time of writing, had recovered approximately 48% from the low experienced mid-year. It was particularly pleasing to see the positive reaction to the granting of the development permit at Don Nicolas which paves the way for development of this economically attractive project. This, along with the excellent progress at Ollachea, continues to add value to our portfolio and I am confident that this will receive strong market recognition as we continue with the development of our asset portfolio.

Once again, I would like to extend my appreciation to our team for their outstanding efforts. I also thank our loyal shareholders for their ongoing patience and support as we build the Company.

Note 1 – Significant Accounting Policies

The financial information contained in this Interim Report does not constitute statutory accounts as defined by the Companies (Jersey) Law 1991. No statutory accounts for the period have been delivered to the Jersey Registrar of Companies. The financial information contained in this Interim Report has neither been audited nor reviewed by the auditors

The statutory accounts for the year ended 31 December 2011 have been filed with the Jersey Registrar of Companies. The auditors' report on these accounts was unqualified. The consolidated financial information contained in this Interim Report has been presented and prepared in accordance with interim reporting standards, in a form consistent with the annual accounts and in accordance with accounting policies and standards applicable to those annual accounts. However, these interim accounts do not include all the disclosures required for those annual accounts. Both the annual accounts and these interim accounts have been prepared in accordance with International Financial Reporting Standards. There have been no changes in the Company's accounting policies since 31 December 2011.

The consolidated interim financial statements of the Company for the period ended 30 September 2012 comprise the Company and its subsidiaries (together referred to as the "Group").

This Interim Report has been approved for issue by the Board of Directors on 2 November 2012.

Note 2 – Going Concern

Having taken into account the balance of cash at 30 September 2012 and the fact that the Corihuarmi mine has a positive cash flow, the Directors of the Company consider that it will have sufficient funds to continue as a going concern for the foreseeable future.

Note 3 – Earnings per Share

The earnings per share for the third quarter has been calculated at US$0.01 (2011: US$0.03) using the net income for the period US$1,710,000 (2011: US$3,585,000) and the weighted average number of ordinary shares in issue during the three month period ended 30 September 2012 of 151,902,884 (2011: 118,582,584).

Included in other receivables is an amount of US$13,049,000 (2011: US$10,452,000) relating to sales tax paid on the purchase of goods and services. This balance is expected to be fully recovered in due course against the revenue earned from exploitation of the respective projects. Included within this is a total of US$9,361,000 (2011: US$7,253,000) relating to purchases for the Ollachea and the Don Nicolas projects, which will not be recovered in the next accounting period and has therefore been included in non-current assets.

Note 8 – Provision

The Group has made a provision of US$2,580,000 against the present value of the cost of restoring the Corihuarmi site and Ollachea exploration tunnel site to its original condition. This provision is an estimate of the cost of reversing the alterations to the environment which had been made up until 30 September 2012. The timing and cost of this rehabilitation is uncertain and dependent upon the duration of the mine life and the quantity of ore which will be extracted from the mine. At present time, it is estimated that the remaining mine life of Corihuarmi is approximately 3 years with the approval of the new Environmental Impact Assessment in January 2012.

Note 9 – Interest Bearing Loan

This bank loan bears interest at 3.5% over the London Interbank Offered Rate (“LIBOR”), is secured against the assets of the Group and is due and payable on 31 December 2012. The terms of this loan were amended subsequent to the end of the period. (Refer to note 16)

Note 10 – Share Capital

On 5 March 2012, the Company issued 29,260,000 ordinary shares at a price of CAD$1.13 per share (equivalent to GBP£0.72 based on exchange rate at pricing) as a private placement of common shares to raise gross proceeds of CAD$33,063,800. A total of $2,153,456 in commissions and professional fees was paid in cash in connection with this placement.

In April 2012, the Company issued 3,060,000 ordinary shares at a price of £0.45 for the exercise of incentive stock options.

On 3 April 2012, the Company granted a total 3,485,000 incentive stock options at an exercise price of £0.81 for a period of 5 years. Additionally the Company granted 200,000 incentive stock options at £0.59 for a period of 5 years on 14 May 2012. Finally, the Company granted 150,000 incentive stock options at £0.53 for a period of 5 years on 04 September 2012. These options were fair valued with a Black Scholes option pricing model using the following assumptions:

Date of Grant	**03 April 2012**	**14 May 2012**	**04 September 2012**
Share price on date of grant	£0.65	£0.47	£0.42
