

# Management's Discussion and Analysis For the quarter ended 31 March 2022

The following Management's Discussion and Analysis, prepared as of 13 May 2022, should be read together with the consolidated financial statements (unaudited) of Minera IRL Limited (the "Company") for the quarter ended 31 March 2022 and related notes thereto, which were prepared in accordance with International Financial Reporting Standards ("IFRS"). Additional information about Minera IRL Limited, including the Company's most recently filed Annual Information Form and the risks and uncertainties discussed therein may be found at the Company's website at <u>www.minera-irl.com</u> and within the Company's SEDAR profile at <u>www.sedar.com</u>.

All figures are expressed in United States dollars ("\$") unless otherwise noted. References to "C\$" are to Canadian dollars.

# Highlights First Quarter ended 31 March 2022

### <u>Financial</u>

- Gold sales of 5,067 ounces (Q1 2021: 5,875 ounces) at an average realized gold price of \$1,860 per ounce (Q1 2021: \$1,766 per ounce).
- Revenue of \$9.4 million, (Q1 2021: \$10.4 million)
- Gross profit of \$1.3 million (Q1 2021: \$3.1 million).
- After tax loss of \$1.1 million (Q1 2021: \$1.2 million).
- Cash balance of \$3.1 million at 31 March 2022 (31 December 2021: \$4.5 million).
- Debt of \$76.8 million at 31 March 2022 (31 December 2021: 75.6 million).

### **Operational Performance**

- <u>Corihuarmi, Peru</u>
  - Gold production from the Corihuarmi Gold Mine of 4,736 ounces (Q1 2021: 5,487 ounces).
  - Ore mined and stacked of 880,074 tonnes (Q1 2021: 931,625 tonnes).
  - Total cash costs were \$1,609 per ounce produced (Q1 2021: \$1,177).
  - Total all-in sustaining costs (AISC) were \$1,969 per ounce produced (Q1 2021: \$1,429)
  - The Company's mining operations have not been materially affected by the COVID-19 pandemic.

### • <u>Ollachea, Peru</u>

• The Company continues with its Community programs and maintains an excellent relationship with the Ollachea Community.

## **Background and Business of the Company**

Minera IRL Limited ("Minera IRL" or the "Company") is a Jersey registered company which, together with its subsidiaries, engages in mining of precious metals. Currently, the Company trade its ordinary shares on the Canadian Securities Exchange and on the Bolsa de Valores de Lima.

In Peru, the Company operates the Corihuarmi Gold Mine and has been advancing its flagship project, the Ollachea Gold Project (the "Ollachea Project"), towards production. At Ollachea, the Company has completed an NI 43-101 compliant Preliminary Economic Assessment and has received the approval of its an Environmental and Social Impact Assessment ("ESIA") and construction permit from the Peruvian authorities.

In June 2015, the Company announced that it had arranged a \$70,000,000 secured finance facility (the "Bridge Loan") structured by the Peruvian state-owned development and promotion bank, Corporación Financiera de Desarrollo S.A. ("COFIDE") and syndicated through Goldman Sachs Bank USA. The Bridge Loan was part of a senior project credit facility of up to \$240,000,000 described in a letter of mandate signed by COFIDE and Minera IRL. This senior project credit facility was to be structured by COFIDE, in conjunction with Minera IRL, to build the Ollachea Gold Project (the "Ollachea Project").

In March 2017 COFIDE terminated the letter of mandate without providing any reason for their decision. The Bridge Loan was due for repayment in June 2017.

On 20 June 2017 the Company announced it had filed a request for an arbitration against COFIDE with the Arbitration Centre of the Lima Chamber of Commerce.

On 16 September 2019 the Company announced that the Court of Arbitration had issued its Arbitration Award. The Award provided that COFIDE must pay an aggregate amount of \$34.2 million for damages. The Court of Arbitration declared that it did not have jurisdiction to require repayment of the Bridge Loan because the Bridge Loan facility expressly provides that it is subject to the jurisdiction of the courts of New York, United States. Subsequently, COFIDE filed a lawsuit for annulment of the Arbitration Award. No amount for the damages awarded was recognised in the 2019 financial statements given the uncertainty at that year-end over its recoverability.

On 31 December 2019 the Company signed a Memorandum of Understanding ("MOU") with COFIDE which was extended several times until 7 November 2020. During this period both the collection of damages by the Company and the collection of the debt and/or interests by COFIDE remained suspended. The objective of the MOU was to allow both parties to reach an agreement in settlement of the obligations imposed by the Arbitration Award announced on 16 September 2019 as well as related matters, including repayment of the Bridge Loan.

On 12 November 2020 the Company announced it had settled its dispute with COFIDE. The summary of the settlement agreement is that the Company owes COFIDE US\$70 million in principal and US\$31.9 million of accrued interest (calculated to 10 November 2020), however, COFIDE has yet to provide the invoices to support the tax deductibility of these interests. Also, it was agreed that COFIDE owed the Company US\$34.2 million pursuant to the September 2019 Arbitration Award, plus interest from 17 July 2017 to 10 November 2020. The amounts due and receivable have been offset and the Company will pay the net balance to COFIDE within 36 months. To guarantee the full repayment of the balance owed to COFIDE, Corporate Trusts contracts have been assigned over the Ollachea Project's mineral concessions, the shares of the Peruvian subsidiary Compañía Minera Kuri Kullu S.A. and over future cash flows from the same Project. COFIDE withdrew its legal claim for annulment of the Arbitration Award once the Trust contracts were registered at the public registry. Also, as per the terms of this agreement certain penalties are applicable while the balance of the debt owed to COFIDE is not fully repaid. These penalties

are based on percentages applicable over the amount of the Arbitration Award according the following timetable:

• \$2,053,000 (6% on the Arbitration Award amount) if the balance of the debt is not repaid before 15 November 2021. This amount was accrued in the third quarter of 2021.

• An additional penalty of \$1,368,000 (4% on the Arbitration Award amount) if the balance of the debt is not repaid before 15 November 2022. These penalties shall be added to the amount owed to COFIDE and will be paid within the 36 months term established for the full payment of any outstanding debt with COFIDE.

On 24 June 2021 the Company announced that through formalizing the terms agreed on 12 November 2020, four inter-related agreements between COFIDE and the Company had been signed:

• A Cash Flow Trust Agreement, which creates a trust over the cash flows generated from the Ollachea Project, to guarantee the payment obligations of the Company to COFIDE by channeling those cash flows through a revenue account to be managed by La Fiduciaria;

• An Asset Trust Agreement, which creates a trust over the shares held by the Company in its Peruvian subsidiary Compañía Minera Kuri Kullu S.A., as well as the Ollachea Project's concessions owned by the subsidiary to guarantee the payment obligations of the Company to COFIDE by transferring ownership of the securities and mortgages to La Fiduciaria in trust;

• A Refinancing of the Credit Agreement, which establishes the terms and conditions for the payment of the principal and accrued and accruing interest on the Company's debt with COFIDE; and

• A Compensation Agreement, which establishes the terms and conditions for the payment of consequential damages to the Company by COFIDE pursuant to the September 2019 Arbitration Award, plus accrued and accruing interest.

The Bridge Loan is secured by the Ollachea Project's assets, mining reserves, mining concessions and rights and a pledge of the shares of the Company's subsidiary, Compañía Minera Kuri Kullu S.A., which holds the Ollachea Project. The assets of the Corihuarmi Mine are not included as a guarantee of the Bridge Loan. If the Company is not able to secure an alternative source of funds to repay the debt with COFIDE, the Company may have to relinquish its ownership of the subsidiary, Compañia Minera Kuri Kullu S.A. and therefore the Ollachea Project. All net assets associated with the Ollachea Project would be fully impaired as a result.

Neither the assets of nor the cash flows generated by the Corihuarmi mine are included in these Trust Agreements.

If the Company is not able to secure an alternative source of funds to repay the debt with COFIDE, the Company will have to relinquish its ownership of the subsidiary, Campañia Minera Kuri Kullu S.A. and therefore the Ollachea Project. All net assets associated with the Ollachea Project would be fully impaired as a result.

Notwithstanding that there can be no guarantee that an alternative source of funding will be secured within the required timescale or on acceptable terms, the Directors consider that an alternative funding will be obtained to fully repay the debt with COFIDE plus interest and to develop the Ollachea Project. The cash generated from gold production at the Corihuarmi Mine is required to fund the working capital requirements of the Company in the meantime.

# Impact of COVID-19

It is impossible to predict with certainty the final impact of COVID-19. This pandemic might have negative impacts for the operations of the Company in the future. Management is constantly evaluating the impact of COVID-19, however given the fluidity and volatility of the situation, it is not possible to predict future outcomes.

The Company complies with the guidelines of the surveillance, prevention and control plan laid down by the Peruvian government which allows the continuation of its mining operations. To date, no disruptions on mining operations, gold production or sales have occurred. The Company considers that at the date of the filing of this report there are no material impacts that may affect the application of the going concern principle or any item of the financial statements.

The Company's cash flow is sufficient to meet its commitments and to fund its working capital requirements in the face of this crisis. The Company has not made, nor plans to make, any wage or job cuts. Meanwhile, it is constantly re-evaluating mine workers' mobilization and demobilization plans, prioritizing their health and safety.

# Corihuarmi Gold Mine, Peru

The Company's 100% owned Corihuarmi gold mine is located approximately 160 kilometres southeast of Lima, Peru, in the Central Andes at an altitude of almost 5,000 metres. The Company acquired the Corihuarmi leases in 2002 and the mine was brought into production in March 2008. Below is a summary of the key operating statistics for Corihuarmi for the quarters ended 31 March 2022 and 2021:

Operating Parameters	Quarter ended 31 March	
	2022	2021
Waste (tonnes)	725,733	597,576
Ore mined & stacked on heaps (tonnes)	880,674	931,625
Ore grade, mined and stacked (g/t)	0.18	0.23
Gold produced (ounces)	4,736	5,487
Gold sold (ounces)	5,067	5,875
Realized gold price (\$ per ounce sold)	\$1,860	\$1,766
Total cash costs (\$ per ounce produced) <sup>1</sup>	\$1,609	\$1,177
Total all-in sustaining costs (\$ per ounce produced) <sup>1</sup>	\$1,969	\$1,429

<sup>1.</sup> Refer to Non-IFRS Measures at the end of this MD&A.

Ore mined and stacked during the first quarter of 2022 was 880,674 tons, a decrease of 5% compared to the 931,625 tons mined and stacked during the first quarter of 2021.

Gold production during the first quarter of 2022 was 14% lower than gold production for the same quarter of 2021, and lower than budgeted as a result of a prolonged transportation strike and road blockages that affected the supply of consumables to the Corihuarmi mine. In addition, severe weather conditions impacted load and haul operations, as well as the processing plant operations because of damage caused to our power station as a result of electrical storms.

Gold sold during the first quarter of 2022 was 5,067 ounces, a 14% decrease compared to the 5,875 ounces sold during the first quarter of 2021.

The average realized gold price during the first quarter of 2022 was \$1,860, a 5% increase compared to the \$1,766 average gold price realized during the first quarter of 2021.

Total cash costs per ounce of gold produced during the first quarter of 2022 were 1,609, 37% higher than total cash costs of \$1,177 per ounce of gold produced during the first quarter of 2021. The increase was due to the combined effect of an increase of 18% cash costs (mainly site operating costs: \$1,101,000) and a decrease of 14% in gold ounces produced. The increase of 18% in cash cost at Corihuarmi is primarily attributed to the higher costs of mining and processing consumables such as cyanide, explosives, and fuel, coupled with longer haul distances from the pits to the leaching pads, increasing hauling times and fuel consumption. Community costs have also increased during the quarter as we reinvest in social programs that were put on standby over the past two years to prevent the spread of COVID-19.

Total all-in sustaining costs ("AISC") per ounce of gold produced during the first quarter of 2022 were \$1,969, 38% higher than the AISC costs of \$1,429 per ounce of gold produced during the first quarter of 2021. The increase was due to the combined effect of an increase of 19% in total all-in sustaining costs (mainly site operating costs: \$1,101,00) and a decrease of 14% in gold ounces produced. The increase in AISC costs is primarily attributed to the increase in cash costs discussed in the previous paragraph, as

well as capital investmenta at the Corihuarmi Mine and local exploration expenses to confirm the continuity of gold mineralization at Corihuarmi.

# Ollachea Project, Peru

Expenditures capitalized during the first quarter of 2022 were \$0.4 million (\$0.2 million during the first quarter of 2021). These expenditures were related mainly to community development and environmental costs.

No exploration activities were carried out during the first quarter of 2022. No exploration activities are planned for 2022.

# Summary of Quarterly Results

The business of the Company is not generally subject to seasonal influences. The variation in revenue, net profit and loss are due to a number of factors, including the market price of gold, the tonnes of ore and the associated grade of these tonnes of ore extracted from the mine and therefore the cost of production, the level of expenses incurred and the impairment of exploration, development and mining assets.

# **Overview of Financial Results**

*Note* – All of the results presented are prepared under *IFRS* and are in United States dollars, which is the Company's functional currency as well.

	-	Quarter ended 31 March	
	2022	2021	
Revenue (\$'000)	9,425	10,378	
Gold sold (ounces)	5,067	5,875	
Realized gold price (\$ per ounce )	1,860	1,766	
Gross profit (\$'000)	1,293	3,119	
After-tax (loss) (\$'000)	(1,082)	(1,181)	
Loss per share (cents)	(0.5)	(0.5)	

#### **Results of Operations**

During the first quarter of 2022, the Company reported sales revenue of \$9,425,000 compared with sales revenue of \$10,378,000 during the first quarter of 2021, a decrease of \$953,000. This 9% decrease was due to the combined effect of a 5% increase in the average price of gold sold and a 14% decrease in the number of gold ounces sold.

During the first quarter of 2022 the Company reported an after tax loss of \$1,082,000 compared with a loss of \$1,181,000 during the first quarter of 2021. The \$99,000 lower loss was mainly the result of a decrease of \$1,826,000 in gross profit partially offset by decreases of \$1,595,000 and \$551,000 in finance expenses and administration expenses, respectively.

Cost of sales during first quarter of 2022 was \$8,132,000, compared with cost of sales of \$7,259,000 during the first quarter of 2021, an increase of \$873,000. The most significant changes between the two periods were increases of \$1,101,000 and decreases of \$291,000 in site operating costs and depreciation, respectively. A period-over-period comparison for the cost of sales is provided in the table below.

	Quarter ended		
	31 March		
	2022	2021	
	(\$'000s)	(\$'000s)	
Mine operating costs	6,348	5,247	
Depreciation and amortization	512	803	
Community and environmental costs	730	589	
Other Costs (royalties and taxes, selling expense, other)	542	620	
Total	8,132	7,259	

#### **Breakdown of Cost of Sales**

Administration expenses during the first quarter of 2022 were \$779,000, compared with administration expenses of \$1,330,000 during the first quarter of 2021, a decrease of \$551,000. The most significant changes between the two periods were decreases of \$819,000 in foreign exchange partially offset by increases of 215,000 and \$85,000 in salaries and wages and professional fees, respectively. A period-over-period comparison for the administration expenses is provided in the table below.

	Quarte	Quarter ended	
	31 M	larch	
	2022	2021	
	(\$'000s)	(\$'000s)

Foreign exchange (gain) loss	(537)	282	
Investor relations	53	14	
Stock exchange fees	60	36	
Office rent and administration	63	69	
Professional and consulting fees	284	199	
Arbitration/negotiation costs	36	63	
Salaries and wages	693	478	
Telecommunication	6	4	
Travel	68	82	
Other	9	45	
Total	779	1,330	

Finance expenses during the first quarter of 2022 were \$1,461,000 compared to \$3,035,000 during the first quarter of 2021, a decrease of \$1,574,000. The most significant change between the two periods was a decrease of \$1,302,000 in interest related to the COFIDE Loan. On 24 June 2021 the Company signed a Compensation Agreement with COFIDE, which establishes the terms and conditions for the payment of the net balance owed to COFIDE. According to this agreement, the \$70,000,000 debt is subject only to the LIBOR rate plus a 6.17% margin. A period-over-period comparison for the finance expenses is provided in the table below.

#### **Breakdown of finance expenses**

	Quarter	Quarter ended	
	31 M	arch	
	2022	2021	
	(\$'000s)	(\$'000s)	
COFIDE Loan interest	1,135	2,437	
Net of: Interest on Arbitration Award	-	(21)	
Other loans interest	-	191	
Other finance expenses	326	428	
Total	1,461	3,035	

### Cash Flow

Cash balance decreased \$1,404,000 during the first quarter of 2022, from \$4,483,000 to \$3,079,000. Operating activities during this quarter generated \$1,580,000 whereas investment activities and financing activities used \$870,000 and \$2,114,000, respectively.

Investing activities during the first quarter of 2022 used \$870,000, compared with \$671,000 used during the first quarter of 2021, an increase of \$199,000. The change was mainly due to increases of \$164,000 and \$43,000 in acquisitions of property, plant and equipment, and deferred development expenditures, respectively. A period-over-period comparison for the investing activities is provided in the table below.

	Quarte	Quarter ended	
	31 M	31 March	
	2022	2021	
	(\$'000s)	(\$'000s)	
Acquisition of property, plant and equipment	427	263	
Deferred exploration and development expenditures	451	408	
Disposal of property, plant and equipment	(8)	-	
Total	870	671	

### **Breakdown of Investment activities**

Financing activities during the first quarter of 2022 used \$2,114,000, compared with \$3,306,000 used during the first quarter of 2021, a decrease of \$1,192,000. The change was mainly due to a decrease in loan repayments of \$1,300,000, offset by an increase of \$109,000 in payment of lease liabilities. A period over period comparison for the financing activities is provided in the table below:

### **Breakdown of Financing activities**

	Quarte	Quarter ended	
	31 M	arch	
	2022	2021	
	(\$'000s)	(\$'000s)	
Repayment of loans	-	1,300	
Payment of lease liabilities	2,064	1,955	
Payment of finance expenses	50	51	
Total	2,114	3,306	

# Legal Actions Involving Company

Please refer to section "Background and Business of the Company" on page 4.

The Company is not currently involved in any other legal proceedings nor was it involved in any other legal proceedings during the quarter ended 31 March 2022 and nor, to the knowledge of management, are there any legal proceedings currently contemplated which may materially affect the business and affairs of the Company or that would likely be considered important to a reasonable investor in making an investment decision.

### Outlook

At 31 March 2022, the Company had a working capital deficit of \$3,075,000 (defined as current assets less current liabilities).

In 2022, the Company forecasts gold production of 23,000 ounces from Corihuarmi mine. The capital budget of Corihuarmi for 2022 is \$1.9 million to build heap leach pad 5E and \$1.1 million for other capital expenditures. The Company expects that the following quarters will see a gold production increase resulting from the construction of this new 5-hectare pad and the associated leaching capacity increase

### Ollachea and the COFIDE Bridge Loan

Please refer to section "Background and Business of the Company" on page 4.

### Capital Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration, development and operation of its mining assets. In the management of capital, the Company includes its cash and cash equivalent balances, interest bearing loans and components of shareholders' equity.

The Company manages the capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

The Company is not currently subject to externally imposed capital requirements.

### Liquidity and Capital Resources

As at 31 March 2022, the Company had cash of \$3,079,000, compared with \$4,483,000 as at 31 December 2021.

As at 31 March 2022, the Company had a working capital deficit of \$3,075,000. Working capital is defined as current assets less current liabilities.

The above conditions indicate the existence of a material uncertainty which may cast doubt on the Company's ability to continue as a going concern.

#### Going Concern Basis

This report has been prepared on a going concern basis. The Company's future plans and expectations are based on the assumption that the Company will be able to continue in operation for the foreseeable future and will realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. There can be no assurance that the Company will be able to generate sufficient cash from operations or obtain adequate financing in the future or, if available, that such financing will be on acceptable terms. Despite the settlement agreement signed with COFIDE in November 2020, the Company does not currently have the capital required to repay in full the balance owed to COFIDE. If the Company cannot repay in full the balance owed to COFIDE by November 2023 it could lose the Ollachea Project. Also, the Company may be required to delay, scale back or eliminate various programs and may be unable to continue in operation. The Company may seek additional financing through debt or equity offerings. Any equity offering will result in dilution to the ownership interests of the Company's shareholders and may result in dilution to the value of such interests.

### **Commitments and Contingent Liabilities**

The Company is subject to various laws and regulations governing its mining activities. These laws and regulations are continually changing and generally becoming more restrictive. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

On 12 November 2020 the Company announced it had settled its dispute with COFIDE. As per the terms of this settlement the Company owed COFIDE US\$31.9 million of accrued interest at that date. However, COFIDE has yet to provide the invoices to support the tax deductibility of these interest expenses. As a consequence, in case of a tax audit, the tax authority might object the tax deductibility of these interests. Also, as per the terms of this agreement certain penalties are applicable while the balance of the debt owed to COFIDE is not fully repaid. These penalties are based on percentages applicable over the amount of the Arbitration Award according the following timetable:

• \$2,053,000 (6% on the Arbitration Award amount) if the balance of the debt is not repaid before 15 November 2021. This amount was accrued in the third quarter of 2021.

• An additional penalty of \$1,368,000 (4% on the Arbitration Award amount) if the balance of the debt is not repaid before 15 November 2022. These penalties shall be added to the amount owed to COFIDE and will be paid within the 36 months term established for the full payment of any outstanding debt with COFIDE.

During 2019, the Company was issued a tax reassessment by the Peruvian Tax Authority for the year ended 31 December 2017 related to the deductibility of expenses and interest relative to the COFIDE Bridge Loan. If the Company is unsuccessful in this appeal, an aggregate amount of \$5,300,000 would be payable, including tax, penalties and interest calculated as at 31 March 2022.

During 2021, the Company was issued a tax reassessment by the Peruvian Tax Authority for the year ended 31 December 2015 related to the deductibility of expenses and interest relative to the COFIDE Bridge Loan and the write off of intangible assets. If the Company is unsuccessful in this appeal, an aggregate amount of \$5,000,000 would be payable, including tax, penalties and interest calculated as at 31 March 2022.

The Company entered into a contract with Empresa de Generacion Electrica San Gaban S.A. for the supply of power during the construction and operation stages of the Ollachea Project. This contract included certain minimum power usages for each of the construction and operation stages. In March 2017 the Company entered into an amended power contract extending the term to start the construction stage for sixty months from 1 March 2017. If the contract is terminated due to the construction stage not commencing within the sixty months term, the Company would have to pay a penalty for an amount

equivalent to approximately \$2,400,000. Otherwise, the Company agreed to pay a fixed monthly compensation for an amount equivalent to approximately \$11,000 for a period of nine and a half years starting on the seventh month after Ollachea commencing the operation stage.

In June 2015, the Company secured a \$70,000,000 Bridge Loan from COFIDE. The financial structuring costs related to the Bridge Loan included a 0.9% net smelter return royalty on gold production from the Ollachea Project granted to Sherpa. The Company has the right to buyback and cancel this royalty from Sherpa by paying a buy-back fee of \$5,566,000.

In August 2013, the Macquarie Finance Facility was amended to increase the amount available by \$10,000,000. As a condition of drawing down these funds the Company awarded a 1% royalty on gross revenue minus refining costs on gold sales from the Company's Ollachea Project. The Company has the right to buyback and cancel this royalty from Macquarie Bank by paying a buyback fee of \$5,000,000.

## Financial Instruments

The Company's principal financial assets comprise of cash and cash equivalents, and other receivables. The Company's financial assets are classified as loans and receivables and are measured at amortised cost. The Company's financial liabilities include trade and other payables, interest bearing loans and other long term liabilities. They are all classified as financial liabilities and measured at amortised cost.

### **Risks**

The Company operates in the resource industry, which is highly speculative, and has certain inherent exploration, development and operating risks which could have a negative effect on the Company's operations.

Significant risk factors for the Company include operating, land title, environmental regulations and compliance, litigation, surface rights, health and safety, the ability to obtain additional financing, metal prices, Mineral Reserves and Resources estimates, insurance coverage, infrastructure, key management and staff, legal climate considerations, changes in government policy, geopolitical climate, government, currency, economic, local community, geological, competition, and general business risk, as well as the risks associated with public health crises, including COVID-19.

Additionally, there are risks specifically related to the COFIDE Bridge Loan. For further information, please refer to paragraph "Background and Business of the Company" on page 4 and section 5 Risk Factors on the Company's 2021 Annual Information Form filed on SEDAR at <u>www.sedar.com</u>.

#### Risks associated with public health crises, including COVID-19

The Company's business, operations and financial condition could be materially adversely affected by the outbreak of epidemics, pandemics or other health crises, such as the outbreak of COVID-19. The international response to the spread of COVID-19 has led to significant restrictions on travel, business closures, quarantines, global stock market volatility and a general reduction in consumer activity. Such public health crises can result in delays and disruptions on the operating and supply chains, global stock market volatility, restrictions on movement of people and labour shortages, shipping and travel disruptions; and shutdowns as a result of government regulation and prevention measures, or a fear of any of the foregoing risks, all of which could affect commodity prices, interest rates, credit risk and inflation. In addition to the current COVID-19 pandemic, any future outbreak of similar pathogens could have an adverse impact on global economic conditions which may adversely impact the Company's operations and/or the operations of suppliers and service providers, including refining service providers, and the demand for the Company's production.

As at the date of this report, the duration of COVID-19 cannot be predicted. It is unknown whether and how the Company may be affected if the pandemic persists for an extended period of time. In particular, the region in which we operate may not have sufficient public infrastructure to adequately or efficiently respond to such event, which could have a materially adverse effect on the Company's operations.

#### Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Prudent management of liquidity risk implies maintaining sufficient cash and cash equivalents as well as an adequate amount of committed credit facilities. Management of the Company safeguards its cash resources and makes regular forecasts of the requirements to use those resources. If necessary, management adapts its plans to suit the resources available.

Despite the settlement agreement signed with COFIDE in November 2020, the Company does not currently have the capital required to repay in full the balance owed to COFIDE. If the Company cannot repay in full the balance owed to COFIDE by November 2023 it could lose the Ollachea Project.

#### Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company is exposed to credit risk in so far as it deposits cash with its banks. However, the banks used are reputable international institutions. In addition the Company is exposed to sovereign risk in so far as it is owed recoverable sales tax by the government of Peru.

#### **Currency risk**

Foreign currency risk is the risk that the fair value of assets and future cash flows will fluctuate as a result of changes in foreign currency exchange rates. The Company operates in Peru and is therefore exposed to foreign exchange risk arising from transactions denominated in foreign currencies. The operating results and the financial position of the Company are reported in United States dollars. Fluctuations of local currencies in relation to the US dollar will have an impact upon the reported results of the Company and may also affect the value of the Company's assets and liabilities. The Company has not entered into any agreements or purchased any instruments to hedge any currency exposures.

#### Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Debt obligations are exposed to interest rate variations.

#### **Commodity price risk**

Commodity price risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in gold prices. The price for gold is impacted by world economic events that dictate the levels of supply and demand. The ability of the Company to mine, develop and explore its mineral properties and the future profitability of the Company are directly related to the market price of precious metals, specifically gold. The Company monitors gold prices to determine appropriate actions to be undertaken. The Company has not entered into any agreements or purchased any instruments to hedge possible gold price risk. The Company is also exposed to the risk that the cost of mining, development or construction activities for its planned activities might increase and cause some elements to be uneconomic.

## **Off-Balance Sheet Arrangements**

The Company has no off-balance sheet arrangements.

# **Transactions with Related Parties**

During the quarter ended 31 March 2022, the Company entered into transactions with directors and key management as disclosed on Note 7 of the consolidated financial statements (unaudited) for the quarter ended 31 March 2022. As at 31 March 2022, the Company owed \$89,000 to directors and key management. Also, during the quarter ended 31 March 2022, certain related parties of directors and key management received \$44,000 as salary and professional fees on normal commercial terms.

# Significant Accounting Policies

The Company follows the accounting policies described in the audited consolidated financial statements for the year ended 31 December 2021, which have been filed on SEDAR <u>www.sedar.com</u>.

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Based on historical experience, current market conditions and expert advice, management makes assumptions that are believed to be reasonable under the circumstances. These estimates and assumptions form the basis for judgments about the carrying value of assets and liabilities and reported amounts for revenues and expenses.

## **Critical Accounting Estimates**

The preparation of consolidated financial statements requires the Company to select from possible alternative accounting principles, and to make estimates and assumptions that determine the reported amounts of assets and liabilities at the balance sheet date and reported costs and expenditures during the reporting period. Estimates and assumptions may be revised as new information is obtained, and are subject to change. The Company's accounting policies and estimates used in the preparation of the consolidated financial statements are considered appropriate in the circumstances, but are subject to judgments and uncertainties inherent in the financial reporting process.

### Intangible Assets

Property acquisition costs and related direct exploration costs may be deferred until the properties are placed into production, sold, abandoned, or impaired, where appropriate. The Company's accounting policy is to capitalize exploration costs, which is consistent with IFRS, and the policy is consistent with other resource companies which are similar to the Company. An alternative policy would be to expense these costs until a feasible mineral resource has been objectively established. Management is of the view that its current policy is appropriate for the Company at this time. Based on annual impairment reviews made by management, or earlier if circumstances warrant, in the event that the long-term expectation is that the net carrying amount of these capitalized exploration costs will not be recovered, then the carrying amount is written down accordingly and the write-down is charged to operations. A write-down may be warranted in situations where a property is to be sold or abandoned; or exploration activity ceases on a property due to unsatisfactory results or insufficient available funding.

#### **Impairment**

In undertaking an impairment review for the operating mine or advanced exploration projects an economic model is prepared which includes full details of the mining and processing schedule, head grade, strip ratios of waste to ore, operating costs and capital costs. From this information the amount of gold production is calculated and revenues estimated. Operating costs, including royalties and refining charges, and capital costs are entered and a cash flow model is produced, which is used to calculate the net present value of the pre-tax cash flow from the operation or project. This net present value is then compared to the carrying value of the operation or project on the balance sheet and an assessment is made regarding impairment.

Should any key parameters differ from the assumptions contained within the technical economic model, such as tonnes of ore mined, grade of ore mined, recovery profile or gold price, the net present value will be affected either positively or negatively. If the impact is negative, an impairment charge may be required that has not been recognized in these financial statements.

#### Asset Retirement Provisions

Restoration costs will be incurred by the Company at the end of the operating life of the Company's facilities and properties. The ultimate restoration liability is uncertain and can vary in response to many factors including changes to relevant legal requirements, the emergence of new restoration techniques, experience at other production sites, or changes in the risk-free discount rate. The expected timing and amount of expenditure can also change in response to changes in reserves or changes in laws and regulations or their interpretation. As a result, there could be significant adjustments to the provisions established which would affect future financial results.

#### **Depreciation Rate**

Mining properties are depreciated on a straight line basis over the expected life of the mine. The calculation of mine life and depreciation could be impacted to the extent that actual production in the future is different from current forecast production based on proven plus probable reserves. This would generally result from significant changes in any of the factors or assumptions used in estimating reserves.

#### Share Based Payments

The Company uses the Black-Scholes Option Pricing Model for valuation of share-based compensation. Option pricing models require the input of subjective assumptions including expected price volatility, interest rate, and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's earnings and equity reserves.

# Management's Responsibility for Financial Statements

The information provided in this report, including the consolidated financial statements, is the responsibility of management. In the preparation of these statements, estimates are sometimes necessary to make a determination of future values for certain assets or liabilities. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying condensed interim consolidated financial statements.

## Disclosure Controls and Internal Control over Financial Reporting

Management of the Company is responsible for the design and implementation of disclosure controls and procedures and for internal controls over financial reporting ("ICFR") as required by National Instrument 52-109 – Certification of Disclosure in Issuers' Annual and Interim Filings.

The Company's disclosure controls and procedures are designed to provide reasonable assurance that all relevant information is communicated to senior management to allow timely decisions regarding the required disclosure. Management has evaluated the effectiveness of the Company's disclosure controls and procedures. Based upon the results of that evaluation, the Company has concluded that, the Company's disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed by the Company is recorded, processed, summarized and reported, within the appropriate time periods and is accumulated and communicated to management.

The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS as issued by the IASB. The Company's internal control over financial reporting includes policies and procedures that:

- Require maintaining records that accurately and fairly reflect, in reasonable detail, the transactions and dispositions of assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary for preparation of financial statements in accordance with IFRS;
- Provide reasonable assurance that the Company's receipts and expenditures are made only in accordance with authorizations of management and the Company's Directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Company's consolidated financial statements.

The Company's internal control over financial reporting may not prevent or detect all misstatements, whether due to error or fraud, because of inherent limitations. A control system, no matter how well designed or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Additionally, projections of any evaluation of effectiveness for future periods are subject to the risk that controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with the Company's policies and procedures.

There has been no change in the Company's internal control over financial reporting during the quarter ended 31 March 2022 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

# **Outstanding Share Data**

The Company has an authorized share capital of an unlimited number of no par Ordinary Shares, of which 231,135,028 are issued as at the date of this report. Each share entitles the holder to one vote. All shares of the Company rank equally as to dividends, voting powers and participation in assets upon a dissolution or winding up of the Company.

As at the date of this report, the Company had no options issued or outstanding for the benefit of directors, employees and consultants of the Company under a Company's Share Option Plan. However, 11,556,751 options with an exercise price of C\$0.20 were to be issued as part of the fees payable to Sherpa in regards to the COFIDE Bridge Loan financing. These options have not yet been granted however the entitlement remains.

As disclosed on paragraph "Subsequent Events" the Company granted to a consultant an option to purchase 4,600,000 ordinary shares at an exercise price of CDN \$ 0.085.

# **Changes in Accounting Policies**

The Company did not adopt any new accounting policies during the quarter ended 31 March 2022.

### Subsequent Events

On 4 April 2022 the Company announced that it had retained Maxwell Mercantile Inc. to assist it in developing and implementing an effective investor relations program. Pursuant to a signed retainer agreement, Maxwell Mercantile Inc. is to receive a monthly retainer of US \$10,000 over an initial term of eight months. The Company also granted Maxwell Mercantile Inc. an option to purchase 4,600,000 ordinary shares at an exercise price of CDN \$ 0.085 for a term of three years.

# Management and Board Changes

Mr. Michael Iannacone resigned as a director on 27 January 2022. On 22 February 2022 Mr. Lema was appointed Chairman of the Audit Committee and on the same date Mr. Martin Mount was appointed as a member of the Audit Committee.

### Additional Information

Additional information regarding Minera IRL, including Minera IRL's Annual Information Form for the year ended 31 December 2021 is available on the Company's website at <u>www.minera-irl.com</u> or on SEDAR at <u>www.sedar.com</u>.

## **Cautionary Statement on Forward-Looking Information**

Certain information in this MD&A, including information about the Company's financial or operating performance and other statements expressing management's expectations or estimates of future events, performance and exploration and development programs or plans constitute "forward-looking statements". Forward-looking statements often, but not always, are identified by words such as "seek". "believe", "expect", "do not expect", "will", "will not", "intend", "estimate", "anticipate", "plan", "schedule" and similar expressions of a conditional or future oriented nature identify forward-looking statements. Forward-looking statements are, necessarily, based upon a number of estimates and assumptions. While considered, by management, to be reasonable in the context in which they are made forward-looking statements are inherently subject to political, legal, regulatory, business and economic risks and competitive uncertainties and contingencies. The Company cautions readers that forwardlooking statements involve known and unknown risks, uncertainties and other factors that may cause Minera IRL's actual financial results, future performance and results of exploration and development programs and plans to be materially different than those expected or estimated future results, performance or achievements and that forward-looking statements are not guarantees of future performance, results or achievements. Forward-looking statements are made as of the date of this MD&A and Minera IRL assumes no obligation, except as may be required by law, to update or revise them to reflect new events or circumstances. Risks, uncertainties and contingencies and other factors that might cause actual performance to differ from forward-looking statements include, but are not limited to, the Company's ability to refinance the COFIDE Bridge Loan and replace the Senior Project Debt Facility, changes in the price of precious metals and commodities, changes in the relative exchange rates of the US dollar against the Peruvian nuevo sol, interest rates, legislative, political, social or economic developments both within the countries in which the Company operates and in general, contests over title to property, the speculative nature of mineral exploration and development, operating or technical difficulties in connection with the Company's development or exploration programs, increasing costs as a result of inflation or scarcity of human resources and input materials or equipment. Known and unknown risks inherent in the mining business include potential uncertainties related to the title of mineral claims, the accuracy of mineral reserve and resource estimates, metallurgical recoveries, capital and operating costs and the future demand for minerals. Please see **Risks**, elsewhere herein.

### **Qualified Person**

Pursuant to National Instrument 43-101, Mr. Martin Mount FGS CGeol – Fellow No.16658 of the Geological Society of London, and FIMMM CEng – Fellow No.47566 of the Institute of Materials, Minerals and Mining, is the Qualified Person ("QP") responsible for the technical disclosure in this MD&A.

### Non-IFRS Measures

"Total cash costs" includes include costs such as mining, processing and administration (excluding depreciation and amortization) plus applicable royalties, workers' profit participation cost, and other nonsite costs (transport and refining of metals, community and environmental costs). These costs are then divided by the ounces sold to arrive at "total cash cost per ounce produced".

"Total all-in sustaining costs" includes "Total cash costs" plus administrative expenses, mine closure accretion, exploration expenses and capital expenditure. These costs are then divided by the ounces sold to arrive at "total all-in sustaining cost per ounce produced".

Both of these measures may vary from one period to another due to operating efficiencies, waste-to-ore ratios, grade of ore processed and gold recovery rates in the period.

Management believes this information is useful to investors because this measure is considered to be a key indicator of a company's ability to generate operating earnings and cash flow from its mining operations. This data is furnished to provide additional information and is a non-GAAP and non-IFRS measure that does not have any standardized meaning prescribed by GAAP or IFRS. It should not be considered in isolation as a substitute for measures of performance prepared in accordance with IFRS, and is not necessarily indicative of operating costs presented under IFRS. The following table reconciles these non-GAAP measures to the consolidated financial statements.

	Quarter ended 31 March	
	2022	2021
Cost of sales	\$8,132	\$7,259
Less:		
Depreciation	512	803
Cash costs	\$7,620	\$6,456
Ounces of gold produced	4,736	5,487
Total cash costs per ounce produced	\$1,609/oz	\$1,177/oz
Total cash costs plus:		
Administration expenses <sup>1</sup>	\$719	\$560
Mine closure accretion	144	126
Lease liabilities accretion	91	179
Exploration expenses	120	52
Capital Leases payments	204	204
Capital expenditure	428	264
Total all-in sustaining costs (AISC)	\$9,326	\$7,841
Ounces of gold produced	4,736	5,487
Total all-in sustaining costs per ounce produced	\$1,969/oz	\$1,429/oz

Note: All \$ amounts (except \$/oz) are in thousands of dollars (\$000's)

<sup>1.</sup> Excluding expenses related to the negotiations with COFIDE.
